

THE AMERICAN
UNIVERSITY OF ROME
GRADUATE SCHOOL

Conference

Sustainable Food Systems ↔ Sustainable Diets

Friday, 11 October 2019

Suggested format for the extended abstracts (800-1,200 words)

- 1. Introduction.** Provide background information (why is the topic of your research relevant? What have other authors found out about the topic?) and the specific question you tried to answer in your study (what is your aim and/or hypothesis?)
- 2. Methods.** Provide clear information on how (and where) the data were collected and what methods were used to analyze the data.
- 3. Results.** Describe your major findings. Try to be as succinct as possible, presenting only the most relevant data in condensed form.
- 4. Discussion and Conclusions.** Explain your interpretation and the implications of your results (do not leave the reader thinking “So what?”). Continually refer to your results (but do not repeat them). Do not extend your conclusions beyond those which are directly supported by your results. Be sure to address the objectives of the study (which you stated in the introduction). Discuss the significance of your results in light of other published work. End the discussion with a short summary or conclusion regarding the significance of your work.
- 5. References.** Include the most important references.
- 6. Contact information.** Author names, affiliations, and an email address for the lead author

Extended abstracts and a short CV should be sent **no later than 30 May 2019**.

Feedback will be given **by 20 July 2019**.

The selected extended abstracts will be included in the Conference Proceedings
